Soil science Wikipedia

Most empirical knowledge of soil in nature comes from soil survey efforts. Soil survey, or soil mapping, is the process of determining the soil types or other properties of the soil cover over a landscape, and mapping them for others to understand and use. It relies heavily on distinguishing the individual influences of the five classic soil

forming factors.

Historic Mapping London

Readers of Mapping London, and Londoners in general, will be very familiar with the striking straight lines of the Tube Map. But you probably won't have seen this map before, which employs the same kind of schematisation to show London's now completely vanished tram and trolleybus network (there is a tram in south London now, but it wasn't around when this map was created).
