Agile Testing and Quality Strategies Discipline Over Rhetoric

It's important to note that an agile independent test team works significantly differently than a traditional independent test team. The agile independent test team focuses on a small minority of the testing effort, the hardest part of it, while the development team does the majority of the testing grunt work.

How Many Test Users in a Usability Study

4. Summary: The answer is 5, except when it's not. Most arguments for using more test participants are wrong, but some tests should be bigger and some smaller. If you want a single number, the answer is simple: test 5 users in a usability study. Testing with 5 people lets you find almost as many usability problems as you'd find using many more test participants.
