

HOW TO CREATE A MOBILE APPLICATION

RELATED BOOK :

Mobile app Wikipedia

A mobile app or mobile application is a computer program or software application designed to run on a mobile device such as a phone/tablet or watch. Apps were originally intended for productivity assistance such as Email, calendar, and contact databases, but the public demand for apps caused rapid expansion into other areas such as mobile games, factory automation, GPS and location-based

Mobile Emulators and Simulators The ultimate guide to

The most useful tools for mobile web are emulators and simulators. In Chapter 4 of Programming the Mobile Web I've made an extensive description and installation guideline for creating a desktop mobile testing environment. And in Chapter 13, I've also reviewed other solutions for mobile testing, including four device remote lab solutions.. I've mixed all this information to create this
