### **Where Do We Get Adult Stem Cells Stem Cell Research**

Adult stem cells can be isolated from the body in different ways, depending on the tissue. Blood stem cells, for example, can be taken from a donor's bone marrow, from blood in the umbilical cord when a baby is born, or from a person's circulating blood. Mesenchymal stem cells, which can make bone, cartilage,

### **What to Expect From a Stem Cell Transplant**

A stem cell transplant lets new stem cells take over from your damaged marrow so your body can produce healthy, cancer-free blood cells. Your doctor may want to use stem cells taken from your own blood, or stem cells from a donor. If you use your own stem cells, your blood will be drawn when your cancer is not active.
