Commodity Wikipedia

In economics, a commodity is an economic good or service that has full or substantial fungibility: that is, the market treats instances of the good as equivalent or nearly so with no regard to who produced them. Most commodities are raw materials, basic resources, agricultural, or mining products, such as iron ore, sugar, or grains like rice and wheat.

2000s commodities boom Wikipedia

The 2000s commodities boom or the commodities super cycle was the rise, and fall, of many physical commodity prices (such as those of food, oil, metals, chemicals, fuels and the like) during the early 21st century (2000-2014), following the Great Commodities Depression of the 1980s and 1990s. The boom was largely due to

the rising demand from emerging markets such as the BRIC countries
