### **Psychosexual Stages Simply Psychology**

Freud believed that life was built round tension and pleasure. Freud also believed that all tension was due to the build-up of libido (sexual energy) and that all pleasure came from its discharge.. In describing human personality development as psychosexual Freud meant to convey that what develops is the way in which sexual energy accumulates and is discharged as we mature biologically.

### **Freud's 5 Stages of Psychosexual Development**

So how exactly do the psychosexual stages work? Freud believed that personality developed through a series of childhood stages in which the pleasure-seeking energies of the id become focused on certain erogenous areas. An erogenous zone is characterized as an area of the body that is particularly sensitive to stimulation.
