Amortizing loan Wikipedia

In banking and finance, an amortizing loan is a loan where the principal of the loan is paid down over the life of the loan (that is, amortized) according to an amortization schedule, typically through equal payments.. Similarly, an amortizing bond is a bond that repays part of the principal along with the coupon payments. Compare with a sinking fund, which amortizes the total debt outstanding

Future Value of an Annuity

Example 2: In practical problems, you may need to calculate both the future value of an annuity (a stream of future periodic payments) and the future value of a single amount that you have today: For example, you are 40 years old and have accumulated \$50,000 in your savings account. You can add \$100 at the end of each month to your account which pays an interest rate of 6% per year.
