Model risk Wikipedia

In finance, model risk is the risk of loss resulting from using insufficiently accurate models to make decisions, originally and frequently in the context of valuing financial securities. However, model risk is more and more prevalent in activities other than financial securities valuation, such as assigning consumer credit scores, real-time probability prediction of fraudulent credit card

Hash table Wikipedia

In computing, a hash table (hash map) is a data structure that implements an associative array abstract data type, a structure that can map keys to values. A hash table uses a hash function to compute an index into an array of buckets or slots, from which the desired value can be found.. Ideally, the hash function will assign each key to a unique bucket, but most hash table designs employ an

Best Practices for the Protection of Hospital Based First

Healthcare workers at a hospital receiving contaminated victims for treatment may be termed first receivers (Koenig, 2003). This group is a subset of first responders (e.g., firefighters, law enforcement, HAZMAT teams, and ambulance service personnel). However, most first responders typically act at the site of an incident (i.e., the location at which the primary release occurred).
