

SUSTAINABLE DESIGN ARCHITECTS

RELATED BOOK :

Sustainable architecture Wikipedia

Sustainable architecture is architecture that seeks to minimize the negative environmental impact of buildings by efficiency and moderation in the use of materials, energy, and development space and the ecosystem at large. Sustainable architecture uses a conscious approach to energy and ecological conservation in the design of the built environment.

10 Influential Green Architects HowStuffWorks

Many say the pioneer of green design was the irascible Frank Lloyd Wright, whose innovative organic architecture philosophy focused on creating structures that appeared to be part of their surroundings. But others refute this, noting sustainable architecture has been around forever. Or, at the very least, its principles are ancient.
