List of psychoactive plants Wikipedia

Cannabis (Marijuana) is a popular psychoactive plant that is often used medically and recreationally. The psychoactive substance in Cannabis, THC, is unique in that it contains no nitrogen and is not an indole, tryptamine, phenethylamine, anticholinergic (deliriant), or a dissociative drug. Cannabis plants tend to vary, with different strains producing dynamic balances of cannabinoids (THC

Psychoactive drug Wikipedia

Psychoactive drug use can be traced to prehistory. There is archaeological evidence of the use of psychoactive substances (mostly plants) dating back at least 10,000 years, and historical evidence of cultural use over the past 5,000 years. The chewing of coca leaves, for example, dates back over 8,000 years ago in Peruvian society.

Pteridophytes Biology Encyclopedia plant body

Pteridophytes are a phylum of plants. They are the vascular plants (those having xylem and phloem tissues) that reproduce by releasing spores rather than seeds, and they include the highly diverse true ferns and other graceful, primarily forest-dwelling plants. There are about eleven thousand different species of pteridophytes, making them the most diverse land plants after the flowering
