Bariatric surgery Wikipedia

Bariatric surgery (or weight loss surgery) includes a variety of procedures performed on people who have obesity. Weight loss is achieved by reducing the size of the stomach with a gastric band or through removal of a portion of the stomach (sleeve gastrectomy or biliopancreatic diversion with duodenal switch) or by resecting and re-routing the small intestine to a small stomach pouch (gastric

Nutritional Deficiencies After Gastric Bypass Surgery

Although perioperative complications associated with gastric bypass surgery are generally low (<1%), the postoperative complications can be quite high. 5 For example, because bariatric surgery often involves gut manipulation that alters the natural absorption of nutrients, nutritional deficiencies can develop. The most common deficiencies are vitamin B 12, folate, zinc, iron, copper, calcium
