### **Structural Geology**

The year reaches its end, and I think this is the last Thursday Video post of 2012. It doesn't really have much to do with structural geology, but it is beautiful. Very. Probably you have already seen it, because it has been a big hit in most of social networks.

### **Geology Wikipedia**

Geology (from the Ancient Greek , g ("earth") and - o , -logia, ("study of", "discourse")) is an earth science concerned with the solid Earth, the rocks of which it is composed, and the processes by which they change over time. Geology can also refer to the study of the solid features of any terrestrial planet or natural satellite such as Mars or the Moon.

### **Geology science Britannica com**

During mountain building, rocks became highly deformed, and the primary objective of structural geology is to elucidate the mechanism of formation of the many types of structures (e.g., folds and faults) that arise from such deformation. The allied field of geophysics has several subdisciplines, which make use of different instrumental techniques.

### **Hydrogeology Wikipedia**

Introduction. Hydrogeology is an interdisciplinary subject; it can be difficult to account fully for the chemical, physical, biological and even legal interactions between soil, water, nature and society. The study of the interaction between groundwater movement and geology can be quite complex.
