Annuity Wikipedia

An annuity is a series of payments made at equal intervals. Examples of annuities are regular deposits to a savings account, monthly home mortgage payments, monthly insurance payments and pension payments. Annuities can be classified by the frequency of payment dates. The payments (deposits) may be made weekly, monthly, quarterly, yearly, or at any other regular interval of time.

Time value of money Wikipedia

The time value of money is the greater benefit of receiving money now rather than later. It is founded on time preference.. The time value of money explains why interest is paid or earned: Interest, whether it is on a bank deposit or debt, compensates the depositor or lender for the time value of money.. It also underlies investment.

Investors are willing to forgo spending their money now only
