Child development Wikipedia

Child development entails the biological, psychological and emotional changes that occur in human beings between birth and the conclusion of adolescence, as the individual progresses from dependency to increasing autonomy. It is a continuous process with a predictable sequence, yet having a unique course for every child. It does not progress at the same rate and each stage is affected by the

How To Prompt A Child With Autism Effectively ABA Therapists

Within an ABA program, there will be many opportunities for prompting a child with autism to succeed. It is sort of the cornerstone for a child with autism to learn and to succeed. If a therapist never prompted, a child will be incorrect and therefore motivation to learn drops. Prompting is just another word of helping or assisting the child to a correct response.
