Complexity Wikipedia

Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence

Task oriented and relationship oriented leadership Wikipedia

Mixed conclusions have risen from studies that try to determine the effects of task-oriented and relationship-oriented leadership: some show that relationship-oriented leadership produces greater productivity, while some show that task-oriented leaders create greater group efficacy. However, a common finding is that relationship-oriented leadership will generate greater cohesion within groups
