Forensic Ballistics Criminal Justice Law International

Forensic firearm ballistics is the science of examining the characteristics of firearms, cartridges, and/or bullets found at a crime scene. Ballistic Forensics Specialists are tasked with tying this evidence to crime suspects.

ballistics. Just as natural variations in fingerprint patterns and characteristics provide a key to human identification, minute random markings on the surface of a bullet can individualize a bullet to a firearm. Structural variations and irregularities caused by scratches, nicks, breaks, and wear permit the criminalist to relate a bullet to a gun.
