Life expectancy Wikipedia

Life expectancy is a statistical measure of the average time an organism is expected to live, based on the year of its birth, its current age and other demographic factors including gender. The most commonly used measure of life expectancy is at birth (LEB), which can be defined in two ways. Cohort LEB is the mean length of life of an actual birth cohort (all individuals born a given year) and

Space Marines 1d4chan

The lifespan for Astartes is something of a tricky subject. While it s made clear that Space Marines live many centuries longer than normal humans, exactly how long they re supposed to live has never really been elaborated on. It doesn t help that there has never been a Space Marine shown or described to have ever died of anything resembling old age, and that different chapter bloodlines
