

[SSB CB RADIO](#)

RELATED BOOK :

SSB Radios at CB World

Single side band (SSB) is used both for amateur (ham) radio and is a capability in some CB radios that include this feature. SSB is another way that the radio waves are carried over the air. SSB radios will transmit and receive the standard channels along with lower sideband and upper sideband channels, giving you more channels to operate on. Another benefit of SSB radios is additional power.

How to Use A SSB CB Radio Properly It Still Works

Learn why SSB CB radios are different from regular CB radios. Single Sideband, or SSB, concentrates more signal into a smaller amount of frequency. For this reason the peak power or "peak envelope power" abbreviated PEP is twelve watts, compared to just 4 for an AM CB radio.
