

VOIP TO PSTN GATEWAY

RELATED BOOK :

Connecting your VoIP system to the PSTN VoIP Supply

Depending on where the voice traffic originates from your FXO gateway will convert the voice traffic into the proper form for receipt by the destination network (IP or PSTN). For example: If the voice traffic is originating from the PSTN the VoIP gateway will convert the analog voice signal into a digital signal. This digital signal is then compressed using a codec and broken into a series of packets that are transferred across the IP network using a signaling protocol.
