Basic JavaScript Java Script programming tutorial

The Java Connection. Understandably, JavaScript's connection with Java is regularly misunderstood. They are not the same thing. Java, created by Sun Microsystems, is a full computer programming language like C++, suitable for writing complete, large-scale programs.; JavaScript, on the other hand, was created by Netscape. It was based to some degree on Java the syntax of the code is

JavaScript Wikipedia

JavaScript (/ d v s k r p t /), often abbreviated as JS, is a high-level, interpreted programming language that conforms to the ECMAScript specification. It is a language that is also characterized as dynamic, weakly typed, prototype-based and multi-paradigm.. Alongside HTML and CSS, JavaScript is one of the three core technologies of the World Wide Web.

Functional programming Wikipedia

In computer science, functional programming is a programming paradigm a style of building the structure and elements of computer programs that treats computation as the evaluation of mathematical functions and avoids changing-state and mutable data. It is a declarative programming paradigm, which means programming is done with expressions or declarations instead of statements.
