Stratification seeds Wikipedia

In horticulture, stratification is a process of treating seeds to simulate natural conditions that the seeds must experience before germination can occur. Many seed species have an embryonic dormancy phase, and generally will not sprout until this dormancy is broken.. The term stratification can be traced back to at least 1664 in Sylva, or A Discourse of Forest-Trees and the Propagation of

Fungal Tests Lab Tests Online

Fungal tests are used to help detect and diagnose a fungal infection, to help guide treatment, and/or to monitor the effectiveness of treatment.. For many superficial skin and yeast infections, a clinical examination of the affected body part(s) and microscopic examination of the sample may be sufficient to determine that a fungal infection is present.

Marie Stopes Wikipedia

Marie Charlotte Carmichael Stopes (15 October 1880 2 October 1958) was a British author, palaeobotanist and campaigner for eugenics and women's rights. She made significant contributions to plant palaeontology and coal classification, and was the first female academic on the faculty of the University of Manchester. With her second husband, Humphrey Verdon Roe, Stopes founded the first birth

Pollination biology of Cleomella serrulata and Polanisia

Flowering plants that attract a diverse range of pollinators represent a generalist pollination system. Studying these plants provides valuable information about accessibility of floral resources to pollinators, which is particularly important in areas where scarcity of flowers limits pollinator populations.
