Routing calls between PSTN and VoIP with a SPA3102

This is called VoIP to PSTN Gateway or PSTN to VoIP Gateway functionality. I do not address how to make outbound calls from a phone attached to the SPA3102's PHONE interface in this document. Refer to the following diagram: A factory defaulted SPA3102 with Line 1 registered will behave as follows: 1.

SPA 3102 and softphone to make calls via pstn line Linksys

To use the SPA3102 to bridge an incoming voip call with an outgoing pstn line call your either call the Line 1 port and then forward the call on the User 1 tab to gw0 which is the PSTN Line tab's voip-to-pstn gateway, or you call the PSTN Line port directly.

SPA3102 VoIP to PSTN SPA answers before dialing on PSTN

That is, the caller dials the pstn number desired, the number is sent to the SPA3102 digitally via voip and the SPA3102 receives the number and then dials the number on the attached PSTN line. In other words, the SPA3102 is bridging an incoming voip call with an outgoing pstn line call.

voip Cisco IP Phone to SPA3102 to PSTN Super User

An SPA3102 is meant to connect analog phones to a VoIP service, essentially turning the analog phone into a SIP phone. It is not a PSTN gateway. A 7940 is a SIP phone, it requires a connection to a SIP server to work. This is also true with a 3102.

SPA3102 Dial Plan VOIP to PSTN Gateway Hardware Voice

The VoIP-PSTN gateway (well the gateways in general) IIRC are only for interfacing the 3102 to a PBX like the SPA9000, Asterisk, 3CX etc. I use a 3102 to interface to my 3CX server (originally SPA9000 and tried asterisk as well).
