15 Fascinating Facts About Honey Bees thoughtco com

Bees that maintain the hive work diligently to keep it clean. The only bee that defecates inside the hive is the queen, and there are bees that clean up after her when that happens. Honey bees generally won't even die inside the hive most of the time. They'll go outside to keep their corpse away from their food and nursing young.

Honey bee Wikipedia

A honey bee (or honeybee) is a eusocial, flying insect within the genus *Apis* of the bee clade. They are known for construction of perennial, colonial nests from wax, for the large size of their colonies, and for their surplus production and storage of honey, distinguishing their hives as a prized foraging target of many animals, including honey badgers, bears and human hunter-gatherers.
