Categories of Arrhythmias Texas Heart Institute

Arrhythmias are generally divided into two categories: ventricular and supraventricular. Ventricular arrhythmias occur in the lower chambers of the heart, called the ventricles. Supraventricular arrhythmias occur in the area above the ventricles, usually in the upper chambers of the heart, called the atria.

Heart arrhythmia Wikipedia

Heart arrhythmia (also known as arrhythmia, dysrhythmia, or irregular heartbeat) is a group of conditions in which the heartbeat is irregular, too fast, or too slow. A heart rate that is too fast above 100 beats per minute in adults is called tachycardia and a heart rate that is too slow below 60 beats per minute is called bradycardia.

Defibrillation Wikipedia

As early defibrillation can significantly improve VF outcomes, AEDs have become publicly available in many easily accessible areas. AEDs have been incorporated into the algorithm for basic life support (BLS). Many first responders, such as firefighters, policemen, and security guards, are equipped with them.. AEDs can be fully automatic or semi-automatic.
