Vegetable Gardening for Beginners The Basics of Planting

Make your garden 11 rows wide, with each row 10 feet long. The rows should run north and south to take full advantage of the sun. Vegetables that may yield more than one crop per season include beans, beets, carrots, cabbage, kohlrabi, lettuce, radishes, rutabagas, spinach, and turnips.

Vegetable Gardening for Beginners Gardener's Supply

The first way to maximize space in the garden is to convert from traditional row planting to 3- or 4-foot-wide raised beds. Single rows of crops, while they might be efficient on farms that use large machines for planting, cultivating, and harvesting, are often not the best way to go in the backyard vegetable garden.
