### **Vegetable Gardening for Beginners The Basics of Planting**

A good-size beginner vegetable garden is about 16x10 feet and features crops that are easy to grow. A plot this size, based on the vegetables suggested further down this page, can feed a family of four for one summer, with a little leftover for canning and freezing (or giving away to jealous neighbors).

### **Vegetable Gardening for Beginners Gardener's Supply**

The first way to maximize space in the garden is to convert from traditional row planting to 3- or 4-foot-wide raised beds. Single rows of crops, while they might be efficient on farms that use large machines for planting, cultivating, and harvesting, are often not the best way to go in the backyard vegetable garden.

### **How to grow your own food in your backyard Sunset Magazine**

The city farmer shows how to garden in pots. The collection took on a life of its own. Potted herbs, peppers, tomatoes, and squash fill almost every available spot, with just enough space left over for an alfresco situation: a cafe table, a chair, and a lantern. And, of course, produce fresh off the vine.
