From self to social cognition Theory of Mind mechanisms

Theory of Mind refers to the ability to attribute mental states to oneself and other people (Premack & Woodruff, 1978). This study examined the extent to which Self and Other belief-attribution processes within the Theory of Mind (ToM) mechanism could be distinguished behaviourally, and whether these separable components differentially related to Executive Functioning (EF)

Quantum mind Wikipedia

The quantum mind or quantum consciousness group of hypotheses propose that classical mechanics cannot explain consciousness. It posits that quantum mechanical phenomena, such as quantum entanglement and superposition, may play an important part in the brain's function and could contribute to form the basis of an explanation of consciousness.. Hypotheses have been proposed about ways for quantum

Forget in a Flash A Further Investigation of the Photo

Several results deserve emphasis. First, the photo-taking-impairment effect replicated using a somewhat artificial laboratory task (relative to that used by Henkel, 2014) in which participants observed and took pictures of

paintings as they appeared on a computer screen, a task which would seem to be much easier for researchers to adapt in the future.
