Cell site Wikipedia

A cell site or cell tower is a cellular-enabled mobile device site where antennae and electronic communications equipment are placed typically on a radio mast, tower, or other raised structure to create a cell (or adjacent cells) in a cellular network. The raised structure typically supports antennae and one or more sets of transmitter/receivers transceivers, digital signal processors

EMF Shielding Devices for Cell Phones

Note: Although it is true that cell phones emit low frequency magnetic fields that can be measured in milliGauss, they also emit high frequency microwave radiation which is what all the concern (and publicity) is about, and which the products below are designed to shield. Many clients have contacted us seeking a shield for BOTH magnetic fields and microwaves for their phone.

5 Terrifying Realities Of My Job As A Cell Tower Climber

Maybe you've heard a little something about the deadly dangers of cellphones. Cell radiation, like all things, can

cause cancer in rats, so some insist the only safe way to use a phone is to separate yourself from the headset with a lead-lined Magneto helmet. But the official scientific opinion on the matter, boringly, is "No, there's no evidence phones hurt you."
