Honey Wikipedia

Honey is a sweet, viscous food substance produced by bees and some related insects. Bees produce honey from the sugary secretions of plants (floral nectar) or from secretions of other insects (such as honeydew). They do this by regurgitation, enzymatic activity, and water evaporation. Honey is stored in wax structures called honeycombs.

Honey Bees Overview of Honeybee Types Habitats

Like some other bee species, honey bees are social and live in colonies numbering in the thousands. Three types of adult honey bees reside in one colony: the queen, male drones and infertile female workers. In each colony, there is only one egg-laying queen, but there are thousands of workers.
