Lagging and leading indicators KPI Library

In performance management we often talk about lagging and leading indicators. But what do they mean exactly? Lagging indicators are typically output oriented, easy to measure but hard to improve or influence while leading indicators are typically input oriented, hard to measure and easy to influence.

Conference Board Leading Economic Index Wikipedia

The Conference Board Leading Economic Index is an American economic leading indicator intended to forecast future economic activity. It is calculated by The Conference Board, a non-governmental organization, which determines the value of the index from the values of ten key variables. These variables have historically turned downward before a recession and upward before an expansion.
