Impact of maritime transport emissions on coastal air

1. Introduction. Maritime transport of goods is a relatively clean form of transportation per kilogram of material, and it is therefore currently gaining relative weight with respect to air and road transport (Micco and P rez, 2001, Grewal and Haugstetter, 2007). This form of transportation has also been increasing (and will most likely continue to do so in the future) due to the globalization
