What PLC programming language s are you using

FBD is good to be understood by electronic engineers. I've also used IL, but less, and in my opinion, is an obsolete language for PLC today.

What is the best programming language to program PLCs

The choice of best programming language of PLC depends on what is the application for which it is being used. For process control applications, ladder is considered a better choice because it is the close to the relay/contact logic. It is also a preferred choice where import/export or bulk editing of logic is required.
