Treatment Of Diabetic Retinopathy And Macular Edema

Most laser and non-laser treatments for diabetic eye disease depend on the severity of the eye changes and type of vision problems you have. Diabetic retinopathy is diabetes-related damage to the light-sensitive retina in the back of the eye. As diabetes progresses, chronic high blood sugar levels cause changes that damage the tiny blood vessels in the retina, which makes them leak fluid or

Definition of Diabetic retinopathy MedicineNet

Diabetic retinopathy: Disease of the retina caused by diabetes that involves damage to the tiny blood vessels in the back of the eye. Early disease may not cause symptoms. As the disease progresses, it enters its advanced, or proliferative, stage. Fragile, new blood vessels grow along the retina and in the clear, gel-like vitreous that fills the inside of the eye.
