RELATED BOOK :

Espresso machine Wikipedia

An espresso machine brews coffee by forcing pressurized water near boiling point through a "puck" of ground coffee and a filter in order to produce a thick, concentrated coffee called espresso. The first machine for making espresso was built and patented in 1884 by Angelo Moriondo of Turin, Italy. An improved design was patented on April 28, 1903, by Luigi Bezzera.

How To Make a Latte at Home Without an Espresso Machine

Make your espresso or strongly brewed coffee: As mentioned in the notes above, any strongly brewed espresso from a home espresso maker or a capsule machine like a Nespresso will do. Or use strongly brewed coffee from

an Aeropress, not diluted with any water. I usually start with about 1/3 cup espresso, but this is up to you.
