### **Things You Can Do to Prevent Window Strikes Bird Watcher**

Thump! It's that sickening sound that can only mean another bird has flown into one of your windows. Birds cannot see glass, especially if it is reflecting the nearby habitat or sky. These reflections do not register as such to a bird. This is why millions of birds die or are injured each year in collisions with glass windows in homes and office buildings.

### **Hummingbird how to help injured hummingbirds 1**

1. A hummingbird just flew into my picture window and seems stunned. Its eyes are open but I don't think it can fly. What should I do? Ruby-throated Hummingbirds (*Archilochus colubris*) may fly into stationary objects and moving vehicles. Sometimes this kills them outright and sometimes it causes injuries that lead to the bird's death within a few days.
