Cognitive neuropsychology Wikipedia

Cognitive neuropsychology is a branch of cognitive psychology that aims to understand how the structure and function of the brain relates to specific psychological processes. Cognitive psychology is the science that looks at how mental processes are responsible for our cognitive abilities to store and produce new memories, produce language, recognize people and objects, as well as our ability

Joaquin Fuster

Curriculum Vitae of Dr. Joaquin Fuster. CONTRIBUTIONS TO COGNITIVE NEUROSCIENCE In 1958 Fuster provides the first evidence that the reticular activating system of the brain stem, a neural substrate for arousal from sleep, modulates selective visual attention (Science, 1958). In 1960 he develops one of the first microelectrode methods for single-unit recording.

Sleights of Mind

I've long wished for a book that explained the art of magic from the cognitive neuroscience perspective. Magic is a goldmine of information about the brain, as well as a source of fascination.

Leon Festinger Wikipedia

Leon Festinger (8 May 1919 11 February 1989) was an American social psychologist, perhaps best known for cognitive dissonance and social comparison theory. His theories and research are credited with renouncing the previously dominant behaviorist view of social psychology by demonstrating the inadequacy of stimulus-response conditioning accounts of human behavior.
