Recovering from Hip Replacement Surgery Patient

In the Hospital. After your hip replacement surgery, you'll be monitored in the recovery room for several hours and then taken to your hospital room. You may feel some pain. We'll give you medication to make you as comfortable as possible. Anesthesia can depress your breathing and stifle your urge to cough, which may cause mucus

Recovery Time After Total Hip Replacement Surgery Operation

Short-term Recovery. Short-term hip replacement recovery involves the early stages of recovery, such as the ability to get out of the hospital bed and be discharged from the hospital. On days 1 or 2, most total hip replacement patients are given a walker to stabilize them. By the third day after the surgery, most patients can go home.
