### **Cell site Wikipedia**

A cell site or cell tower is a cellular-enabled mobile device site where antennae and electronic communications equipment are placed typically on a radio mast, tower, or other raised structure to create a cell (or adjacent cells) in a cellular network. The raised structure typically supports antennae and one or more sets of

transmitter/receivers transceivers, digital signal processors

### **Mobile phone radiation and health Wikipedia**

The effect of mobile phone radiation on human health is a subject of interest and study worldwide, as a result of the enormous increase in mobile phone usage throughout the world. As of 2015, there were 7.4 billion subscriptions worldwide, though the actual number of users is lower as many users own more than one mobile phone. Mobile phones use electromagnetic radiation in the microwave range

### **EMF Shielding Devices for Cell Phones**

Note: Although it is true that cell phones emit low frequency magnetic fields that can be measured in milliGauss, they also emit high frequency microwave radiation which is what all the concern (and publicity) is about, and which the products below are designed to shield. Many clients have contacted us seeking a shield for BOTH magnetic fields and microwaves for their phone.
