What is a Split Air Conditioner Split vs Packaged AC Units

A split air conditioner is composed of two separate units, a condensing unit and an evaporative coil (known as a condenser, and a coil respectively in short-hand or slang). It is from these two separate units that a split air conditioner gets its name. These units are joined by a set of copper tubing known as a line-set, which transfers refrigerant from one unit to another.

What is a Split Air Conditioner System Network

A split air conditioner consists of an outdoor unit and an indoor unit. The outdoor unit is installed on or near the exterior wall of the room that you wish to cool. This unit houses the compressor, condenser coil and the expansion coil or capillary tubing.

Ductless Mini Split Air Conditioners Buying Guide

Like central air conditioners, these units have a split design but without an elaborate system of ducts. The split system (also called a mini-split, ductless split, or duct-free system) has at least one unit inside the home (this is the evaporator) and one outdoor unit (the condenser).
