Whole blood Wikipedia

Medical use. Whole blood has similar risks to a transfusion of red blood cells and must be cross-matched to avoid hemolytic transfusion reactions. Most of the indications for use are identical to those for RBCs, and whole blood is not used [clarification needed] because the extra plasma can contribute to transfusion associated circulatory overload (TACO), a potentially dangerous complication.

Pain Wikipedia

Pain is a distressing feeling often caused by intense or damaging stimuli. The International Association for the Study of Pain's widely used definition defines pain as "an unpleasant sensory and emotional experience associated with actual or potential tissue damage, or described in terms of such damage"; however, due to it being a complex, subjective phenomenon, defining pain has been a challenge.
