## RELATED BOOK :

### **How does a mother's diet affect her milk KellyMom com**

The short answer to this question is NO you do not need to maintain a perfect diet in order to provide quality milk for your baby. In fact, research tells us that the quality of a mother's diet has little influence on her milk. Nature is very forgiving mother's milk is designed to provide for and protect baby even in times of hardship and famine.

### **Do breastfeeding mothers need extra calories or fluids**

A mother's baseline need for calories (not including lactation) depends upon her activity level, weight and nutritional status. A mother who is less active, has more fat stores, and/or eats foods higher in nutritional value may need fewer calories than a mom who is more active, has fewer fat stores, and/or eats more processed foods.
