ADHD or Autism How Are ADHD and Autism Different

Attention deficit hyperactivity disorder (ADHD) and autism can look a lot like each other. Children with either condition can have problems focusing. They can be impulsive or have a hard time communicating. They may have trouble with schoolwork and with relationships. Although they share many of the same symptoms, the two are distinct conditions.

ADHD and Autism Differing Symptoms of ADD ASD

Evaluating both ADHD and autism remains a clinical skill based on getting to know a child and seeking a comprehensive picture of his life in the real world, a global sense of a child's social and conversational abilities, as well as his play and daily living skills. Diagnosis can be a fluid, ongoing process.
