High blood pressure adults MedlinePlus Medical Encyclopedia

High blood pressure - adults. High blood pressure (hypertension) is when one or both of your blood pressure readings are higher than 130/80 mm Hg most of the time. If the top blood pressure number is between 120 and 130 mm Hg, and the bottom blood pressure number is less than 80 mm Hg, it is called elevated blood pressure.

Marijuana for High Blood Pressure Marijuana Doctors

High blood pressure is also called hypertension. It s a common ailment where the blood pressure in your arteries persistently gets too high. The pressure depends upon how much blood your heart pumps and its resistance in your arteries. The narrower your arteries and the more blood pumped by your heart, the higher your blood pressure gets.
