## RELATED BOOK :

### **Beehive Wikipedia**

A beehive is an enclosed, man-made structure in which some honey bee species of the subgenus *Apis* live and raise their young. Though the word beehive is commonly used to describe the nest of any bee colony, scientific and professional literature distinguishes nest from hive. Nest is used to discuss colonies which house themselves in natural or artificial cavities or are hanging and exposed.

### **Stingless bee Wikipedia**

Stingless bees, sometimes called stingless honey bees or simply meliponines, are a large group of bees (about 500 species), comprising the tribe Meliponini (or subtribe Meliponina according to other authors). They belong in the family Apidae, and are closely related to common honey bees, carpenter bees, orchid bees, and bumblebees. Meliponines have stingers, but they are highly reduced and

### **Overwintering honey bees in single deep hives Honey Bee**

For the second year in a row, I'm overwintering my bees in single-deep hives. After years of running double deeps, and three years with triple deeps, I went to singles beginning about sixteen months ago. My decision was prompted by Thomas Seeley's discussions of single deeps and the fact that very large colonies seem to have disproportionately high mite loads.
