Evolution Wikipedia

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Introduction to evolution Wikipedia

Evolution is the process of change in all forms of life over generations, and evolutionary biology is the study of how evolution occurs. Biological populations evolve through genetic changes that correspond to changes in the organisms' observable traits. Genetic changes include mutations, which are caused by damage or replication errors in organisms' DNA.

The Evolution Of Italian Cinema Neorealism To Post

Argento then made what is predominantly considered to be the greatest Giallo film ever made, though this is arguable, with Profondo rosso (Deep Red, aka The Hatchet Murders, 1975). The film featured brutally unique deaths, and introduced the world to the Italian progressive rock band, Goblin. Goblin would go on to compose several scores for Argento throughout his career, providing pulsating
