Anencephaly Wikipedia

Anencephaly is the absence of a major portion of the brain, skull, and scalp that occurs during embryonic development. It is a cephalic disorder that results from a neural tube defect that occurs when the rostral (head) end of the neural tube fails to close, usually between the 23rd and 26th day following conception. Strictly speaking, the Greek term translates as "no in-head" (that is

Prenatal Alcohol Exposure and the Brain

The regions of the brain that are most seriously affected by prenatal alcohol exposure in terms of ability to function are: Frontal Lobes - this area controls impulses and judgment. The most noteworthy damage to the brain probably occurs in the prefrontal cortex, which controls what are called the Executive Functions. Corpus Callosum - passes information from the left brain (rules, logic) to
