

BEES AND HONEY PRODUCTION

RELATED BOOK :

Honey Production Honeybeesonline com

Honey bees produce honey and in a good year, they produce lots of it, more than they will need, so the beekeeper can remove the excess. This is why most of us keep bees--for the honey. Although, truth be told, we just love keeping bees!

Honey bee Wikipedia

A honey bee (or honeybee) is a eusocial, flying insect within the genus *Apis* of the bee clade. They are known for construction of perennial, colonial nests from wax, for the large size of their colonies, and for their surplus production and storage of honey, distinguishing their hives as a prized foraging target of many animals, including honey badgers, bears and human hunter-gatherers.
