Print your PowerPoint slides handouts or notes Office

For Settings, select the options you want: Slides: From the drop-down, choose to print all slides, selected slides, or the current slide. Or, in the Slides box, type which slide numbers to print, separated by a comma. Print Layout: Choose to print just the slides, just the speaker notes, an outline, or handouts.. The Outline prints only the text in the slides, without images.

How To Insert Many Pictures into Individual Slides in

There are many reasons why you may be interested to insert many pictures into individual slides at once using PowerPoint. For example, if you'd like to protect your PowerPoint presentations by avoiding users to change editable fields or data values, then importing the slides as pictures into a new presentation could be a possible approach.

Rule of Thirds Improve Your PowerPoint Slides Six Minutes

What is the Rule of Thirds? The Rule of Thirds is a guideline for composition that suggests placing key graphic elements along lines which divide your image into thirds, or at the intersections of those lines.. What does that mean? I'm glad you asked. Imagine your PowerPoint slide is divided both vertically and horizontally into thirds,

like this:

Difference Between Google Slides and Microsoft PowerPoint

While PowerPoint is more familiar to some people than Google Slides, there are fewer features accompanying it, meaning users may be missing out on some useful options that Google offers. With Google Slides, that is never an issue. Google slides allows you to take advantage of four key functions within your project:

How can I determine the size of individual slides in a

One caveat: Suppose you have a large image on slide 1 and you've copied it to several other slides. PowerPoint only stores the image once per presentation, but if you publish to multiple presentations, each presentation that includes this image would get a copy of it.

How To Convert a PowerPoint Presentation from 4 3 ratio

It always sucks to show up to a conference with a slide deck that looks lovely with lots of pictures and evocative hipster stock photography all nicely formatted for a 4:3 ratio (1024x768 pixels is common) and then find out their projectors are 16x9 and run something like 1280x720 pixels.

<http://ebookslibrary.club/download/How-To--Convert-a-PowerPoint-Presentation-from-4-3-ratio--.pdf>

How to change the export resolution of a PowerPoint slide

You can change the export resolution in Microsoft PowerPoint by saving a slide in a picture format. There are two steps to this process: using the system registry to change the default resolution setting for exported slides, and then actually saving the slide as a picture at the new resolution.
