

CARPENTRY AND BUILDING CONSTRUCTION

RELATED BOOK :

Carpentry Wikipedia

Carpentry is a skilled trade in which the primary work performed is the cutting, shaping and installation of building materials during the construction of buildings, ships, timber bridges, concrete formwork, etc. Carpenters traditionally worked with natural wood and did the rougher work such as framing, but today many other materials are also used and sometimes the finer trades of

Basic Construction And Carpentry Techniques

Basic carpentry skills are necessary to be able to complete home renovation, home building and other construction projects. A carpenter or home renovator needs to be able to layout a building site; determine the elevations of a site excavation, and concrete footing and other components; build concrete footing and wall forms; frame and sheath floors, walls and roofs; and build stairs.

Carpentry construction Britannica com

Carpentry, the art and trade of cutting, working, and joining timber. The term includes both structural timberwork in framing and items such as doors, windows, and staircases. In the past, when buildings were often wholly constructed of timber framing, the carpenter played a considerable part in building construction; along with the mason he was the principal building worker.
