Sexual reproduction Wikipedia

Sexual reproduction is a kind of life cycle where generations alternate between cells with a single set of chromosomes and cells with a double set of chromosomes (). Sexual reproduction is by far the most common life cycle in eukaryotes, for example animals and plants.. Diploid cells divide into haploid cells in a process called meiosis. Two haploid cells combine into one diploid cell in a

Essential oil Wikipedia

An essential oil is a concentrated hydrophobic liquid containing volatile (defined as "the tendency of a substance to vaporize") aroma compounds from plants. Essential oils are also known as volatile oils, ethereal oils, aetherolea, or simply as the oil of the plant from which they were extracted, such as oil of clove. An essential oil is "essential" in the sense that it contains the "essence of
